

# NiCd RECHARGEABLE ALKALINE BATTERY Type KCSL 8

## Technical data

|   |                     |
|---|---------------------|
| Battery nominal voltage:                    | 1,2 V               |
| Nominal capacity $C_5$ :                    | 8 Ah                |
| Weight (with the electrolyte):              | ca. 0,3 kg          |
| Dimensions (in mm) length x width x height: | 50 x 35 x max. 92,3 |
| Recommended charge current:                 | 0,8A for 16 h       |
| Operating temperature:                      | from -18°C to +50°C |
| Non-effusive:                               | Yes                 |

## Application

- Power source of all types of mobile and lighting devices (helmet torch included).
